

How to publish in Chrome Web Store Guide:

We'll go through steps they explained on the link:

1. Create your item's zip file → we will provide you with this link
2. Create a developer account → follow the instruction from Chrome on the link
3. Upload your item → follow the instruction from Chrome on the link
4. Add assets for your listing → follow the instruction from Chrome on the link
5. Submit your item for publishing → Before clicking on ""SUBMIT FOR REVIEW"" button, fill out all the details as explained below:

Store listing tab:

Description → You can put whatever you want, but I suggest something along these lines:

""Use <YOUR_APP_NAME> to call numbers in Chrome. Allows click to dial from any webpage that has a valid phone number or phone number format.""

Category → Productivity

Promo materials → Add some if you want, or leave empty

Additional fields → Fill out URL fields if you want, or leave empty

Privacy practices tab:

Single purpose → ""The extension allows <YOUR_APP_NAME> users to click-to-dial telephone numbers within Google Chrome. Dialling can be achieved by either clicking on any phone number on the page, or by

selecting a number by dragging a mouse cursor, pressing right-click and choosing ""Call with <YOUR_APP_NAME>"" from the context menu. This allows users to quickly dial any phone number from any web page.""

Permissions justification → context Menus justification: ""The extension uses chrome.contextMenus.create to add ""Call with <YOUR_APP_NAME>"" to context menu for selected text.""

Host permission justification: ""The extension uses Host permission to modify page contents by creating clickable links for detected phone numbers.""

Are you using remote code → ""Yes"" (Justification: ""The extension uses external JavaScript library (included in the package as google_phone_lib.js) for checking if a number is valid, and that library uses 'eval'. The library is available here:

<https://github.com/albeebe/phoneformat.js/blob/v1.0.9/dist/phone-format.js>"")

Data usage → Leave everything unchecked related to the ""What personal and sensitive data do you plan to collect from users now or in the future?"" section.

Check (click) items: ""I do not sell user data to third parties, I do not use or transfer user data for purposes that are unrelated to my item's single purpose, I do not use or transfer user data to determine creditworthiness or for lending purpose"" int the ""I certify that the following disclosures are true"" section.

Payments & distribution tab:

Visibility → Public

Payments → Free

Distribution → All regions

After you have filled in all the info, you should be able to Submit for review, and after Google approves it, it will be available on the store.
