

How to publish in Firefox store Guide:

Follow the instructions on the link under the ""Listing on AMO"" section. We will provide a zip file.

When you get to step 8. The Describe Add-on page displays, here are some suggestions:

Name → <YOUR_APP_NAME> call

Add-on URL → Leave the prefilled url

Summary → Use <YOUR_APP_NAME> to call numbers in Firefox.

This add-on is experimental → leave unchecked

This add-on requires payment, non-free services or software, or additional hardware → leave unchecked

Firefox Categories → Social & Communication

Email and website → Fill if you want to

License → GNU Lesser General Public License, version 3.0

This add-on has a privacy policy → leave unchecked

Notes for reviewer → Put ""The extension uses an external JavaScript library (included in the package as google_phone_lib.js) for checking if a number is valid, and that library uses 'eval'. The library is available here: <https://github.com/albeebe/phoneformat.js/blob/v1.0.9/dist/phone-format.js>""

Submit and proceed.
